

mustafa ali eren

FRONTEND DEVELOPER · AVAILABLE

mustafalieren@proton.me

mobile: +90 537 029 8131

nationality: Turkish

EXECUTIVE SUMMARY

- > 3 years of production frontend experience shipping React + TypeScript across 3 distinct fintech products at one of Turkey's top digital payment platforms
- > Contributed to a shared UI component library used across 3 products – building reusable React + TypeScript components that reduced duplication and kept UI consistent at scale
- > Available immediately; open to remote or Istanbul-based roles

INFORMATION

- > born in 1999, balıkesir, turkey
- > xinacris.github.io
- > completed mandatory military service in the Republic of Turkey

WORKING EXPERIENCE

Papara Software Engineer (Frontend)

2023/08 – 2025/07

- > Contributed to the Papara UI component library (WebUI) in Storybook – building and refining reusable React + TypeScript components consumed across the Web product
- > Reduced design-to-code handoff friction by enforcing consistent component APIs in TypeScript, making shared primitives predictable and reusable for the wider team
- > Drove adoption of strict TypeScript practices (zero `any` types) across the component library, eliminating a class of runtime bugs before they reached production

Papara Software Developer Intern (Frontend)

2022/11 – 2023/07

- > Transitioned from intern to full engineer within 8 months by delivering production-ready components integrated into live Papara products
- > Contributed React components to the WebUI library during internship – work promoted to the production codebase and still in use post-conversion to full-time role

Migros Frontend Developer Intern

2022/07 – 2022/08

- > Delivered a working Angular feature module within a 2-month internship at one of Turkey's largest retail chains, demonstrating fast framework acquisition under production constraints

PERSONAL PROJECTS

Where to Watch React · live

- > React SPA querying a public streaming availability API – lets users find which platforms carry a title across regions; no backend dependency

Idle RPG React Native · WIP

- > Mobile idle game with a deep passive skill tree and near-infinite build combinations – independently designing all game systems, UI, and progression loops

EDUCATION

- > Bachelor of Computer Science, Balıkesir University Sept 2017 – July 2023
- > Politechnika Czestochowska Erasmus Exchange Program, Oct 2021 – Feb 2022

TECHNICAL SKILLS

React Angular JavaScript TypeScript Tailwind CSS Git Storybook Next.js React Native Python
Supabase

MISC. INFORMATION

AVAILABILITY

- > Available immediately
- > Remote-first
- > Open to Istanbul relocation
